

# UNIK Website Audit

unikusa.com • June 8, 2026 • Prepared by Zentara

Section 1: Homepage Review | Section 2: Google and AI Visibility | Section 3: Pinterest SEO

## HOMEPAGE GRADE

**2 / 5**

Needs a full overhaul

## GOOGLE AND AI VISIBILITY

**42 / 100**

Invisible in search results

## SECTION 1 — HOMEPAGE REVIEW

### WHAT A FIRST-TIME VISITOR SEES

#### WORKING

- Products with prices are visible right away
- Free shipping is clearly shown
- Phone number and store hours are at the top
- Easy links to shop by category (Girls, Boys, Uniforms)
- 14-day return policy is shown at the bottom

#### MISSING

- No main title — nothing tells visitors what this store is
- No brand story — 20 years in business, completely hidden
- Cartoon clip art mixed in with real product photos
- Two grammatical errors visible on the page
- No reason to sign up for emails

### THE BIGGEST FIX: ADD A MAIN TITLE

Right now the homepage has no main title at all. Google reads the title first to understand what the page is about. Parents read it first to decide if they are in the right place. Both are currently getting nothing.

#### Suggested title:

*"School Uniforms That Last All Year — Family-Owned in LA for 20+ Years"*

*"Polos, Pants, and Dresses Built for Real Kids — Trusted by LA Families Since 2002"*

### FIX LIST — HOMEPAGE

## DO THIS WEEK — All text changes in Shopify. No developer needed.

|                                                     |                                                                                                                                                                                                                                                                                  |
|-----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Add a main title</b>                          | Go to Shopify: Online Store > Themes > Customize > Homepage. Add a text block at the top with: "School Uniforms That Last All Year — Family-Owned in LA for 20+ Years"                                                                                                           |
| <b>2. Fix two grammar errors</b>                    | First: the trending section says "TOP VIEW IN THIS WEEK" — change it to "Trending This Week." Second: the email signup says "be the first who know our special offers" — change it to "Be the first to know about new arrivals and sales."                                       |
| <b>3. Add a sentence about who UNIK is</b>          | Nothing on the homepage tells parents that UNIK has been in business for 20+ years. Add this below the hero: "Family-owned and operated out of Los Angeles for over 20 years. We design every uniform to hold up all year long — through recess, PE, and everything in between." |
| <b>4. Add a back-to-school banner</b>               | Back to school shopping starts in a few weeks and nothing on the site mentions it. Add a banner at the very top: "Back to School season is coming — shop uniforms now before sizes sell out."                                                                                    |
| <b>5. Swap out the cartoon graphic</b>              | The slideshow has a Back to School image made of cartoon clip art — pencils, backpacks, a clock. It looks like a stock image search. Replace it with one of the real kid photos from the ad shoots.                                                                              |
| <b>6. Pick one brand name and use it everywhere</b> | Some product listings say "UNIKINC" and others say "UNIK RETAIL" right under the product name. It looks like two different stores. Go to each product in Shopify, find the Vendor field, and change it to just "UNIK."                                                           |
| <b>7. Update the year at the bottom</b>             | The footer says "2024 UNIK is a registered trademark." It is 2026. Fix in Shopify: Online Store > Themes > Footer.                                                                                                                                                               |

## THIS MONTH

|                                                           |                                                                                                                                                                                                   |
|-----------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>8. Add a trust row to the homepage</b>                 | Nothing on the page tells a first-time visitor why they should trust UNIK. Add a simple row with three facts: "20+ Years in Business" / "Family-Owned in LA" / "14-Day Returns."                  |
| <b>9. Give people a real reason to sign up for emails</b> | The email signup is buried at the bottom and says "sign up for special offers." Nobody signs up for that. Move it to the middle of the page and offer 10% off their first order instead.          |
| <b>10. Add a size guide near the uniforms</b>             | The most common reason parents don't buy kids uniforms online is they're not sure about sizing. A simple size guide link next to the uniform section removes that hesitation and increases sales. |

## SECTION 2 — HOW WELL GOOGLE AND AI CAN FIND THEM

42/1

### Visibility Score

00

When parents search for school uniforms in LA, UNIK never shows up.

## WHAT WE SEARCHED AND WHAT CAME BACK

| What We Searched                    | UNIK Found? | What Showed Up Instead                                      |
|-------------------------------------|-------------|-------------------------------------------------------------|
| "school uniforms in Los Angeles"    | No          | Yelp listings, Faith Uniforms, school district pages        |
| "best school uniform store near LA" | No          | Yelp, Faith Uniforms, Carrusel Uniforms                     |
| "UNIK Inc Los Angeles" (exact name) | Yes         | Facebook page, unikusa.com, Yelp, YellowPages               |
| "UNIK clothing reviews"             | Barely      | 53 reviews on an obscure site, 1 on Yelp, no Google reviews |
| "kids school uniform store LA"      | No          | Carrusel Uniforms, Award School Uniform (one block away)    |

## THE SCORES EXPLAINED

| Area               | Score | Plain English                                                                                       |
|--------------------|-------|-----------------------------------------------------------------------------------------------------|
| Search by name     | 8/10  | If someone already knows UNIK and types the name, they find the site.                               |
| Search by category | 1/10  | If a parent types "school uniforms Los Angeles" into Google, UNIK never appears.                    |
| Reviews            | 3/10  | 53 reviews on a site called Birdeye that almost nobody uses. 1 Yelp review. No Google reviews.      |
| Mentions online    | 5/10  | Listed on YellowPages and the LA Fashion District. Never mentioned in any news article or blog.     |
| Consistent info    | 5/10  | Two different UNIK listings on Yelp with two different addresses. Google treats this as a red flag. |

## FIX LIST — VISIBILITY

### THIS QUARTER

- 1. Add a size guide page to the website** When parents ask Google "what size uniform for a 7-year-old" — the answer comes from a website page. A simple page titled "UNIK School Uniform Size Guide" would start appearing in those searches.
-

## SECTION 3 — PINTEREST SEO

### WHY PINTEREST

Pinterest works like a search engine, not a social media feed. A pin posted today can still show up in search results two years from now. Each pin links directly back to unikusa.com, which tells Google the site is being referenced from outside sources — a key factor in how Google decides which sites to rank. Parents searching for school uniforms are already on Pinterest. UNIK just needs to be there.

### ACCOUNT SETUP

| Step                                    | What to Do                                                                                                                                                                       |
|-----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Create a Business Account</b>        | Go to <a href="https://pinterest.com/business/create">pinterest.com/business/create</a> . Free. Business accounts get analytics and shoppable pins that personal accounts don't. |
| <b>Write the profile name</b>           | Use: "UNIK — Kids School Uniforms" not just "UNIK." The name is searchable.                                                                                                      |
| <b>Write the bio</b>                    | "Family-owned kids clothing brand in Los Angeles. School uniforms, girls' dresses, and kids' apparel. Sizes 4 to 18."                                                            |
| <b>Connect Shopify</b>                  | Install the free Pinterest app in the Shopify App Store. Products import automatically as shoppable pins.                                                                        |
| <b>Turn on Rich Pins</b>                | In Pinterest settings after connecting Shopify. Rich Pins show the product name, price, and whether it's in stock directly on the pin — looks like a real store listing.         |
| <b>Add a Save button to unikusa.com</b> | Free Shopify app called Pinterest Save Button. Puts a Pinterest icon on every product photo. Customers pin products for you — free content, free backlinks.                      |

### BOARDS TO CREATE FIRST

| Board Name                      | Why This Name                                                          |
|---------------------------------|------------------------------------------------------------------------|
| <b>Girls School Uniforms</b>    | Exact phrase parents type into Pinterest and Google                    |
| <b>Boys School Uniforms</b>     | Same                                                                   |
| <b>Back to School Outfits</b>   | Huge seasonal search traffic every June through August                 |
| <b>Kids Uniform Size Guide</b>  | Ranks for "what size uniform fits my kid" — parents save these         |
| <b>School Uniform Care Tips</b> | Ranks for "how to wash school uniforms" — parents save and share these |

## HOW TO MAKE EACH PIN

### Image format:

Vertical only. 1000 x 1500 pixels (2:3 ratio). Pinterest cuts off square and horizontal images in the feed. Vertical images take up more space and get more clicks.

### What performs best:

- Clean product on white background — Show the price on the image itself. Example: "Girls Navy Polo — \$14.99"
- Full uniform flat lay — Polo, pants, and belt laid out together. Shows parents exactly what a complete outfit looks like.
- Color options graphic — One image showing all available colors for a product. Gets saved constantly.
- Size chart as a graphic — Format the size guide as a visual. These get saved and reshared more than any product photo.

### Pin title format:

*"Girls Navy Polo School Uniform — Sizes 4 to 16"*

The keyword goes first. The size range goes in the title because parents search by size.

### Pin description format:

*"Durable school polos built for real kids. Family-owned brand out of Los Angeles. Available in navy, white, and burgundy. Sizes 4 to 16. Ships fast. Shop at [unikusa.com](https://unikusa.com)"*

Always end with the website. Every pin links back to [unikusa.com](https://unikusa.com) — that link is what tells Google the site is being referenced from outside.

## FIX LIST — PINTEREST

### DO THIS WEEK

- |                                                 |                                                                                                                                                                                                  |
|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Create the Pinterest Business Account</b> | Go to <a href="https://pinterest.com/business/create">pinterest.com/business/create</a> . Use the name "UNIK — Kids School Uniforms." Fill in the bio with the exact wording from this document. |
| <b>2. Connect Shopify to Pinterest</b>          | In Shopify: go to Apps > Search for Pinterest > Install. Products sync automatically. Turn on Rich Pins during setup.                                                                            |

|                               |                                                                                                                                                                                                   |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>3. Create the 5 boards</b> | Girls School Uniforms, Boys School Uniforms, Back to School Outfits, Kids Uniform Size Guide, School Uniform Care Tips. Each board description should include the board name as a keyword phrase. |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

|                                  |                                                                                                                                                             |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>4. Make the first 10 pins</b> | 2 per board. Use vertical images (1000x1500px). Put the keyword in the title. Link every pin to the matching product page on unikusa.com, not the homepage. |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

|                                                    |                                                                                                                                                                   |
|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>5. Schedule 2 pins a day for the first week</b> | Use Pinterest's free built-in scheduler. Click "Publish later" when creating a pin. Spreading pins over time signals to Pinterest that this is an active account. |
|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

### THIS MONTH

|                                                        |                                                                                                                                                                                                                                                  |
|--------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>6. Add the Pinterest Save button to the website</b> | In Shopify: Apps > Search for "Pinterest Save Button" > Install. This puts a Pinterest icon on every product photo. When customers save a product to their own Pinterest, it creates a new pin with a link back to unikusa.com — free backlinks. |
|--------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

|                                                           |                                                                                                                                                                                                                                                                       |
|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>7. Check Pinterest Trends before posting each week</b> | Go to <a href="https://pinterest.com/trends">pinterest.com/trends</a> and search "school uniforms" or "back to school." It shows exactly when searches spike so you know when to post seasonal content. For back to school, that window is mid-May through late July. |
|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
